

Connect Humanity The Fund for Digital Opportunity

Financing Broadband to Power Communities

Connect Humanity is a nonprofit impact investor financing broadband infrastructure in places the market has overlooked. We fund high-impact projects that expand access to affordable, reliable internet, with a focus on low-income, rural, and historically excluded areas. As mission-driven lenders, we will continue to support you post-investment to help ensure your project succeeds.

Why Work With Us?

Flexible capital that fits your context

We tailor funding to your project needs — whether you're a local government, Tribal Nation, or private ISP — with patient capital and innovative financing structures to meet your reality.

Built-in technical assistance

From business planning and stakeholder alignment to post-close deployment support, we bring the experience needed to ensure your broadband network succeeds.

A trusted partner to communities and ISPs

We've worked across the country, from the Carolinas to California, and with Texas border communities, Tribal nations, and the most rural Appalachian towns — earning the confidence of both public and private partners.

Proven impact

Our investments have catalyzed millions in additional public and private capital, bringing affordable broadband to thousands of homes and unlocking economic growth.

Who We Invest In

We work with municipal and Tribal Governments, co-ops, commercial ISPs, and public-private partnerships — any effort committed to delivering long-term community benefit. We're flexible on ownership but firm on accountability: when infrastructure isn't locally owned, we use community benefit agreements to protect local interests. Our capital is often catalytic, filling gaps and anchoring blended financing strategies to get broadband deployments across the finish line.

Our Active Lending

We're currently deploying capital through several targeted funds:

Nationwide

- \$250K–\$1M per project
- For high-impact builds in underserved communities across the U.S.

Tribal Communities

- Up to \$5M per project
- Supporting sovereign, community-led broadband efforts.

New Mexico

- Up to \$3M per project
- Capital available specifically for New Mexico-based builds.

Municipal & Large-Scale Projects

- \$15–\$20M per project
- For municipally-led or qualified private ISP builds (with 5-year terms).

“Connect Humanity can speak our language and understands the economics of rural broadband. The team treated us as partners to develop a plan for the growth of our business and put together a sustainable package to finance it.”

*LaShawn Williamson
CEO, Wave 7 Communications*
